PRODUCT MANUAL

Committed to providing high-performance RFID product for our customers

COMPANY >>> PROFILE

Founded in 2009, Shenzhen Leadercolor Smart Card Co.,Ltd is a comprehensive trade company based on designing, developing, producing and selling products, such as magnetic stripe cards, smart cards, smart tags and etc. Our company is located in the beautiful Longgang District, Shenzhen City, with an elegant environment and convenient transportation.

“Leading technology, human care” is the business philosophy we have been always adhering. Since established, we have been taking "Science and technology services life" as our responsibility, and determining to provide our clients with PVC cards, smart cards, smart tags and other RFID customized services.

On team building, our company has concentrated on personnel training and support. It is a team full of passion and dream, with solidarity working and constant pioneering. We always strive to grow with our staff and create a brilliant together with them!

Our company has been developing new markets by excellent quality and attracting customers by best service. Relying on years of accumulated customer-resources and rich experience, Leadercolor has achieved great success in overseas markets, building a friendly relationship with customers in various countries and regions, and reaching strategic cooperation with many famous companies.

PRODUCT >>> CONTENTS

Part1 RFID TAG

- UHF RFID Windshield Tag P1-2
- UHF RFID Tag P3-5
- UHF RFID Anti-metal Tag P6-8
- UHF RFID Clothing Tag P9-10
- UHF RFID Jewelry Tag P11-12
- NFC Sticker P13-15
- RFID Library Tag P16-17
- RFID Wristband P18-20
- Sports Tag P21
- UHF RFID Hard Tag P22

Part2 RFID ANIMAL EAR TAG P23-26

Part3 RFID SMART CARD P27-28

Part4 RFID READER P29-30

Part5 UHF MODULE P31-32

Our Certificates

Our Advantages

- ① Flexible Size
- ② Design And Special Functional
- ③ Patent
- ④ Quality
- ⑤ Pre-sales Services
- ⑥ Innovative
- ⑦ Market Protection
- ⑧ After-sales Service

Our Company

UHF RFID Windshield Tag

UHF RFID Windshield tag is designed in RFID technology with chip and inlay inside. It is mainly used for automatic vehicle identification system and auto glass retail management. It's with long reading range over 10 meters, waterproof and tamper proof which makes it an high end product in access control.

LDR-10225

LDR-6425

LDR-10035

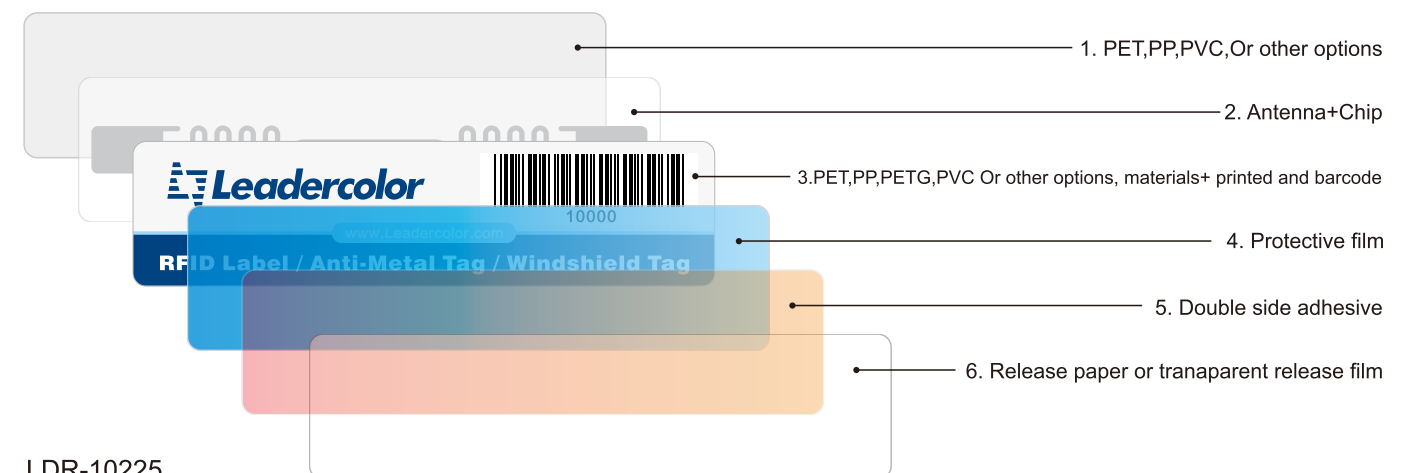

LDR-10225 Size: 102x25mm

RFID Parameters

Item No.	LDR-10225	LDR-6425	LDR-10035
Size	102×25mm/4.02×0.98inch	64×25.4mm/2.5×1inch	100×35xmm/3.94×1.38inch
Protocol	ISO/IEC 18000-6C, EPC Class1 Gen2		
Frequency	Worldwide 840-960Mhz, US 902-928mhz, EU 865-868Mhz		
Chip	Alien Higgs-3		
Memory	EPC 96bits、TID 64bits、User 512bits		
Read&Write	Supported		
Read Range	1-15meters adjustable(reader and environment dependent)		
Data Retention	Years		
Write Endurance	100,000 cycles		

Physical Parameters

Substrate Material	Release paper
Antenna Material	Aluminum etching
Surface Material	PET waterproof
Printing	Offset printing, barcode, series number and logo printing
Encode	Supported
Tamper Proof	Yes
Strong Glue	Yes
Installation	Self adhesive
Operating Temperature	-50°C ~ +85°C
Operating Humidity	20% ~ 90%RH
Package	Roll / Single

LDR-10225

UHF RFID Tag

Quick Details

UHF RFID tag adopts a unique tag antenna design, has excellent performance, can read multiple tags at a long distance, and has high recognition sensitivity. It is widely used in supply chain, asset management, logistics warehousing, anti-counterfeiting and anti-channeling. It supports printing on the printer by volume, and the product shape and logo printing can be customized according to customer needs.

Customized Service:

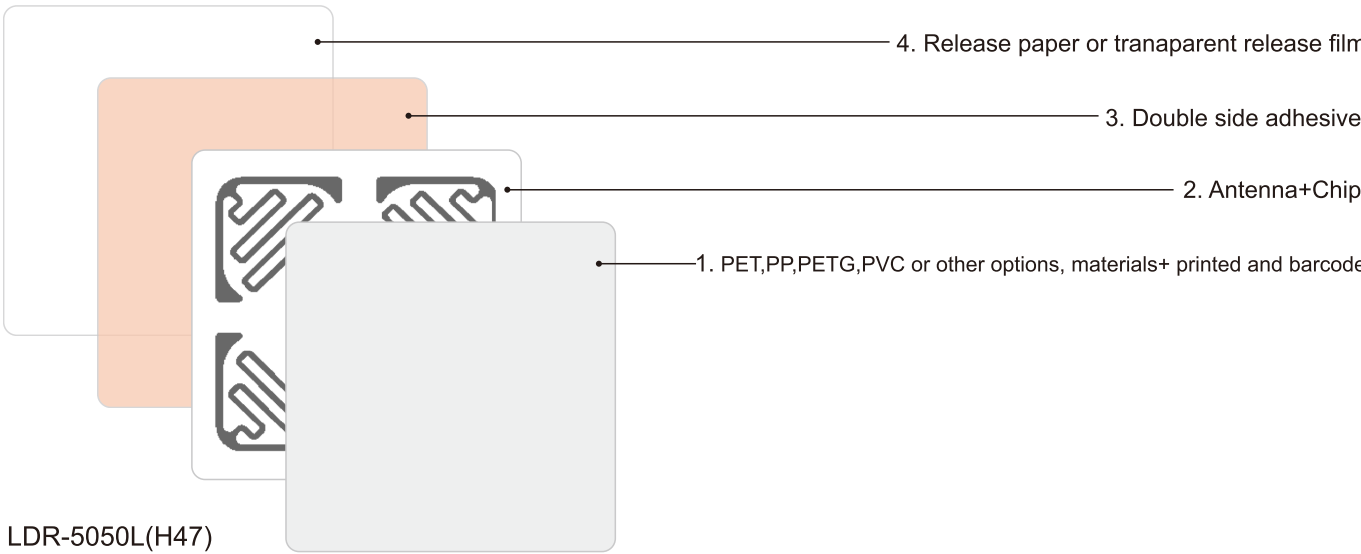

- Customizable size
- Optional chips: Alien Higgs-3; Alien Higgs-4; NXP Ucode 7; Impinj Monza4; Impinj Monza5;
- Optional materials: Coated paper; PVC paper; Synthetic PP paper; PET paper;
- Optional glues: Standard glues; 3M glues; Strong glues;
- Optional printing: Offset printing; Barcode printing; Series number printing; UV printing
- Optional crafts: Tamper proof ; Encoding;

RFID Parameters

Item No.	LDR-5050L
Protocol	ISO/IEC 18000-6C, EPC Class1 Gen2
Frequency	Worldwide 840-960Mhz, US 902-928mhz, EU 865-868Mhz
Chip	Impinj Monza4 H47
Memory	EPC496bits、TID 48bits、User128bits
Read&Write	Supported
Read Range	1-6 meters adjustable(reader and environment dependent)
Data Retention	10 years
Write Endurance	100,000 Cycles
3D Function	Yes

Physical Parameters

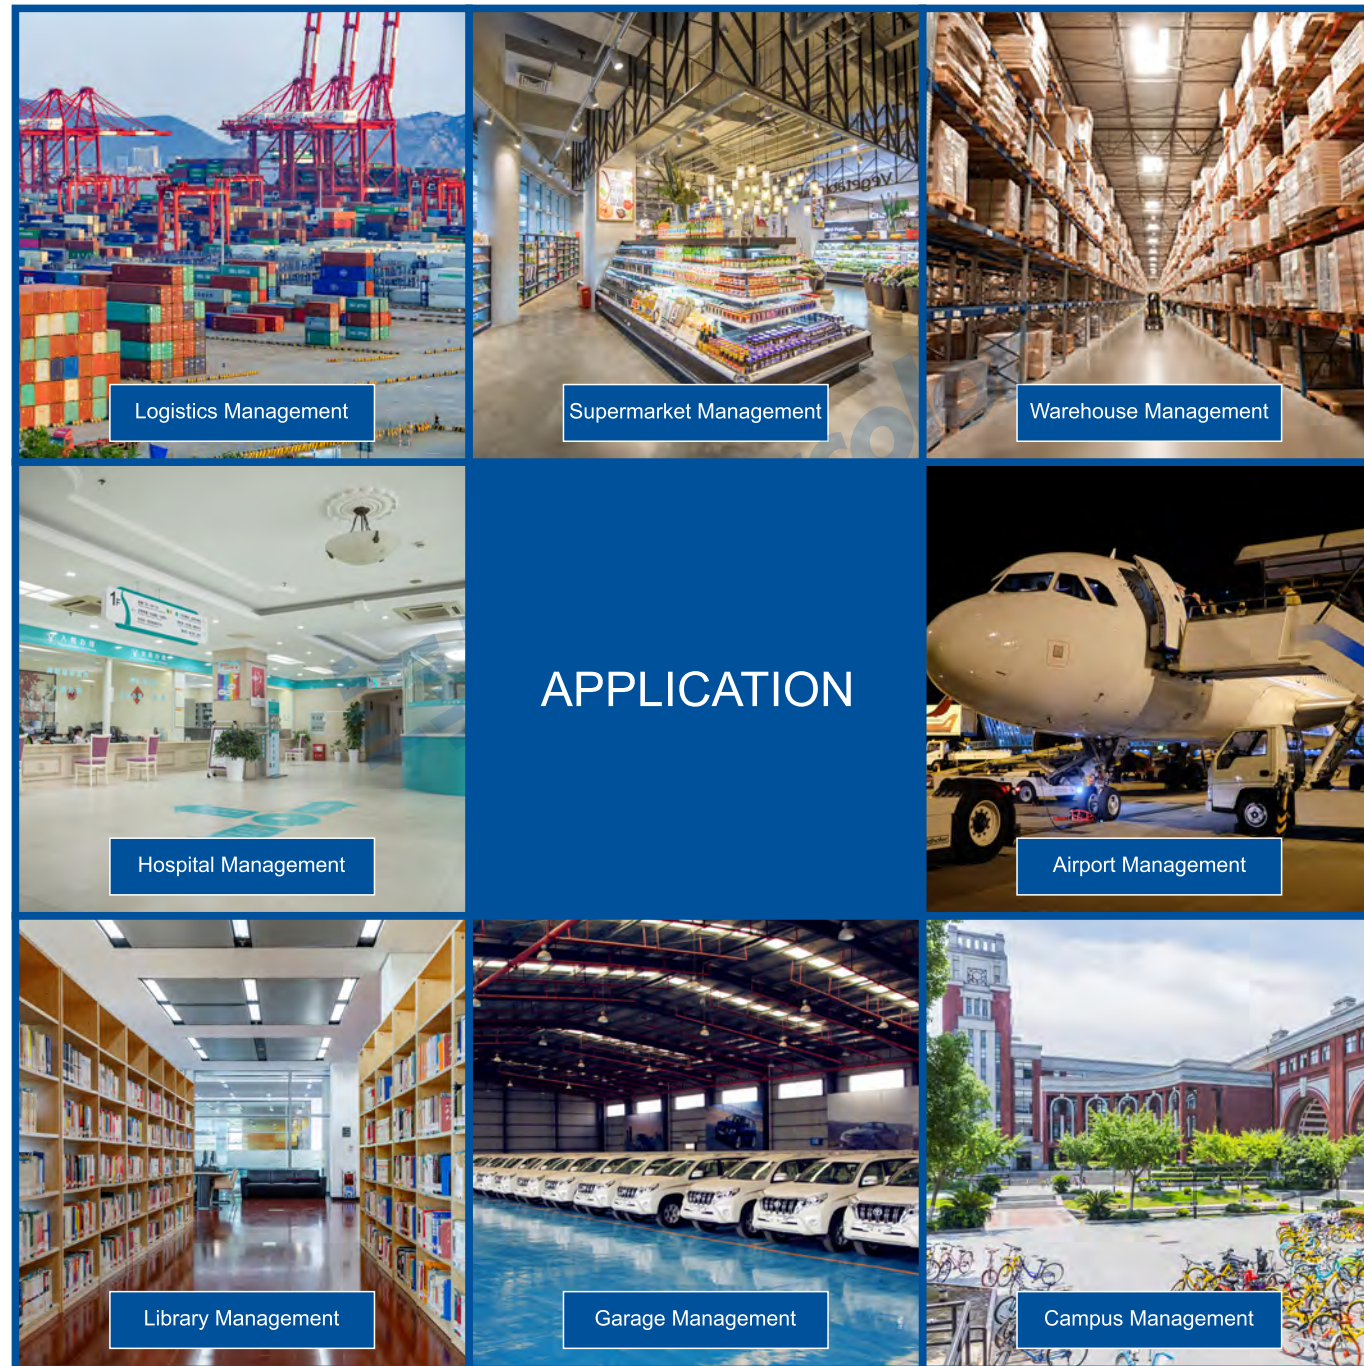

Size	50x50mm (Can be customized)
Substrate Material	Transparent release film
Antenna Material	Aluminum etching
Surface Material	Coated paper (Thermal or transfer optional)
Printing	Offset printing, barcode, series number and logo printing
Encode	Supported
Installation	Self adhesive
Operating Temperature	-25℃~ +65℃
Operating Humidity	20% ~ 90%RH
Package	Roll / Single

LDR-5050L(H47)

Application

- Tracking challenging materials and objects
- Logistic and shipping labels
- File folder and document management
- Manufacturing and warehouse management

UHF RFID Anti-metal Tag

UHF RFID anti-metal tags are specially designed and designed and manufactured for use in harsh environments. They are installed on metal surfaces. Weak interference with RF signals on metals. Technically, the problem that the normall rfid labels cannot be attached to the metal surface is solved. The product is waterproof, acid-proof, alkali-proof and collision-proof. Can easily manage metal materials.

Customized Service:

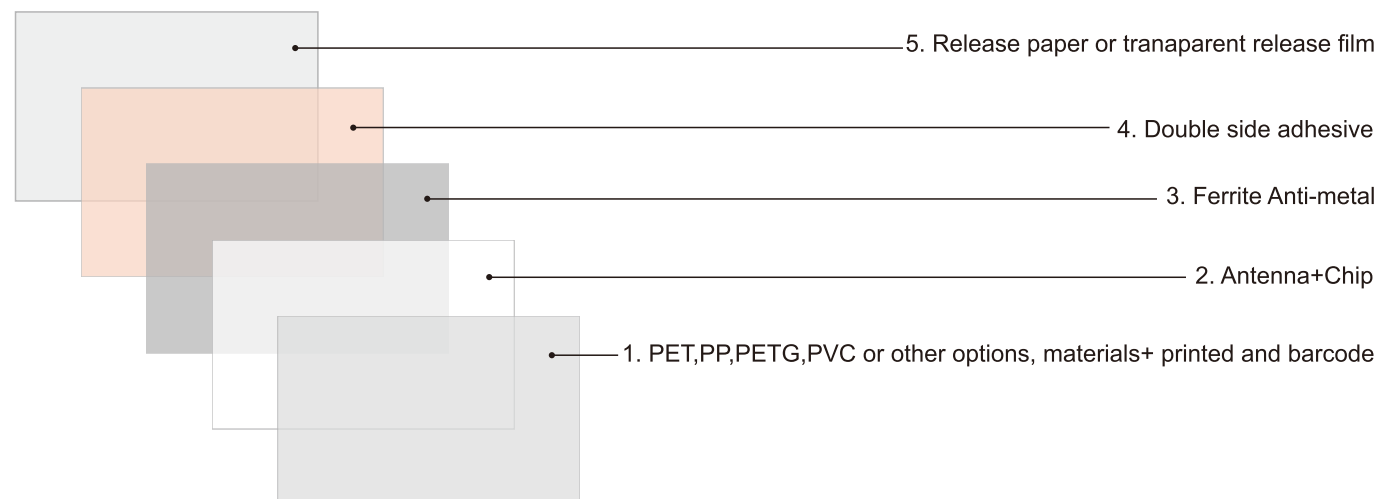

- Customizable size
- Optional chips
- Optional materials
- Optional glue
- Optional printing
- Optional crafts

RFID Parameters

Item No.	LDR-4025M
Protocol	ISO/IEC 18000-6C, EPC Class1 Gen2
Frequency	EU Standard 865-868mhz, US Standard 902-928mhz
Chip	Impinj Monza MR6-P
Memory	EPC128(96)bits、TID 48bits、User32(64)bits、User 512bits, Password: 32bits access, 32bits kill
Read&Write	Supported
Read Range	Max. 0.45meter
Data Retention	10 years
Write Endurance	100,000 cycles
Anti-collision	Support multiple tags reading

Physical Parameters

Size	42x25x0.9mm (Can be customized)
Substrate material	Transparent release film
Antenna material	PET +Aluminum etching
Surface material	Ferrite anti-metal
Printable	Supported for RFID printer
Encode	Supported
Installation	Self adhesive
Operating Temperature	-40℃~ +85℃
Operating Humidity	20% ~ 90%RH, Non-condensing
Package	500pcs/roll
Remark	When it pastes on curving objects, the read range will be shorted by half.

Application

- Item level management
- RFID asset tracking management
- Hospital equipment management
- Metal devices supply chain management

UHF RFID Cothing Tag

RFID Clothing tag is the "ID card" of clothing. It is small in size and easy to install and operate, so that the controlled target can be managed in the whole process and in all directions. It can be recognized from a long distance, with high recognition sensitivity and fast speed, and has a globally unique identification code (TID code). It is mainly used in a wide range of apparel, luggage and footwear industries.

RFID Parameters

Item No.	LDR-9040H
Protocol	ISO/IEC 18000-6C, EPC Class1 Gen2
Frequency	Worldwide 840-960Mhz, US 902-928mhz, EU 865-868Mhz
Chip	Ucode 8
Memory	EPC128bits、TID96bits、User32bits
Read&Write	Supported
Read Range	1-10meters adjustable(reader and environment dependent)
Data Retention	10 years
Write Endurance	100,000 cycles
Anti-collision	Support multiple tags reading

Physical Parameters

Size	90×40×0.76mm (Can be customized)
Substrate Material	Paper
Antenna Material	Aluminum etching
Installation	Self adhesive
Operating Temperature	-10℃ ~ +65℃
Operating Humidity	20% ~ 90%RH
Package	Bags

UHF RFID Jewelry Tag

Jewelry labels are mainly used for display at jewelry counters to improve product quality and make jewelry management easier. But it can also be used in watches, glasses and various other industries. High recognition sensitivity, high security, anti-theft, and improved inventory efficiency.

Customized Service:

- Optional materials: Coated paper; PVC paper; Synthetic PP paper; PET paper;
- Optional glues: Standard glues; 3M glues; Strong glues;
- Optional printing: Offset printing; Barcode printing; Series number printing; UV printing

Package	Bags

NFC Sticker

NFC tags are developed based on non-contact radio frequency identification (RFID) technology and combined with wireless interconnection technology. It provides a very safe and fast communication method for various electronic products that are more and more popular in our daily life. The short-range wireless communication technology combines mobile communication technology to realize multiple functions such as electronic payment, identity authentication, ticketing, data exchange, anti-counterfeiting, and advertising

Encode	Supported
Installation	Self adhesive
Operating Temperature	-25°C ~ +65°C
Operating Humidity	20% ~ 90%RH
Package	6000pcs/roll

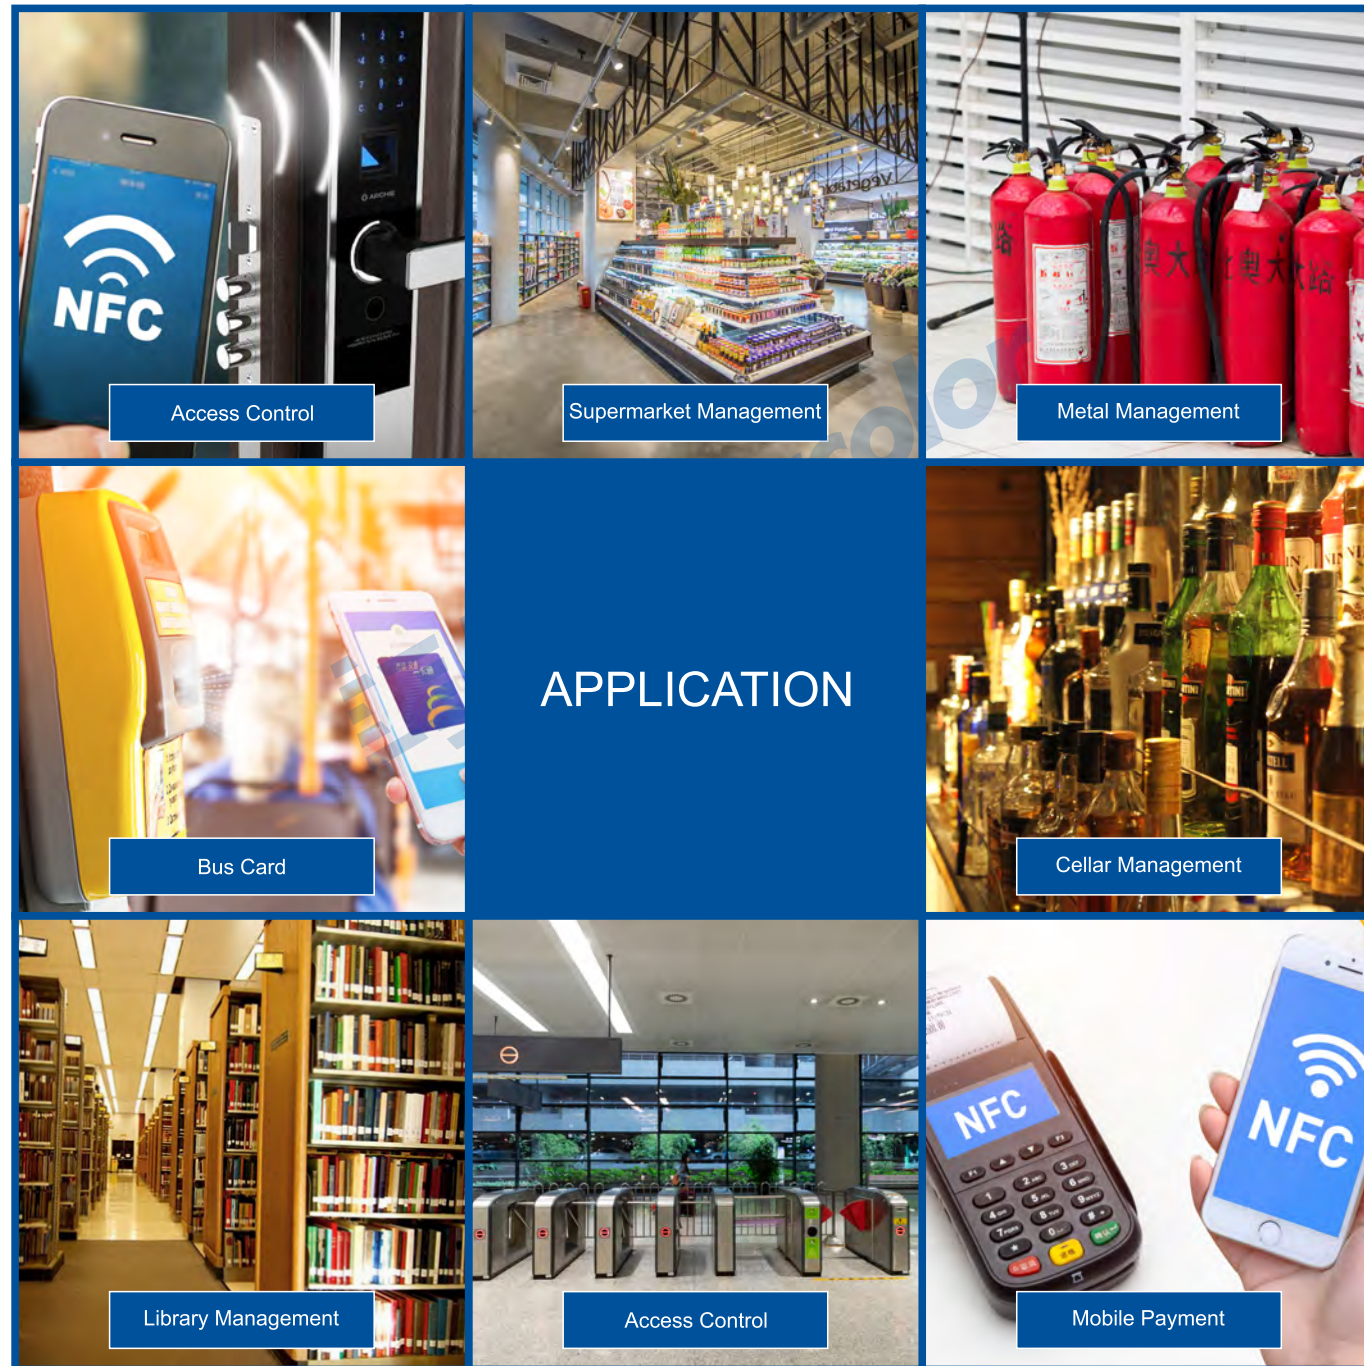

LDF-2012L

Application

- NFC posters, NFC device data connection and data transmission
- Mobile payment, mobile wallet
- Product identification, personnel identification management
- E-ticketing, loyalty system, marketing and advertisements

RFID Library Tag

RFID "intelligent collection system" includes a series of automated management systems such as librarian service system, chip conversion system, self-service borrowing system, self-service return system, collection inventory inspection system, and channel detection system. Each book is affixed with an RFID tag, and an RFID inspection machine is installed at the exit of the library. When someone leaves the library and carries unchecked books or other media materials with RFID tags, the RFID inspection machine will sound an alarm. If someone tries to avoid the alarm and take the book away, the library can still track the book and put it in place.

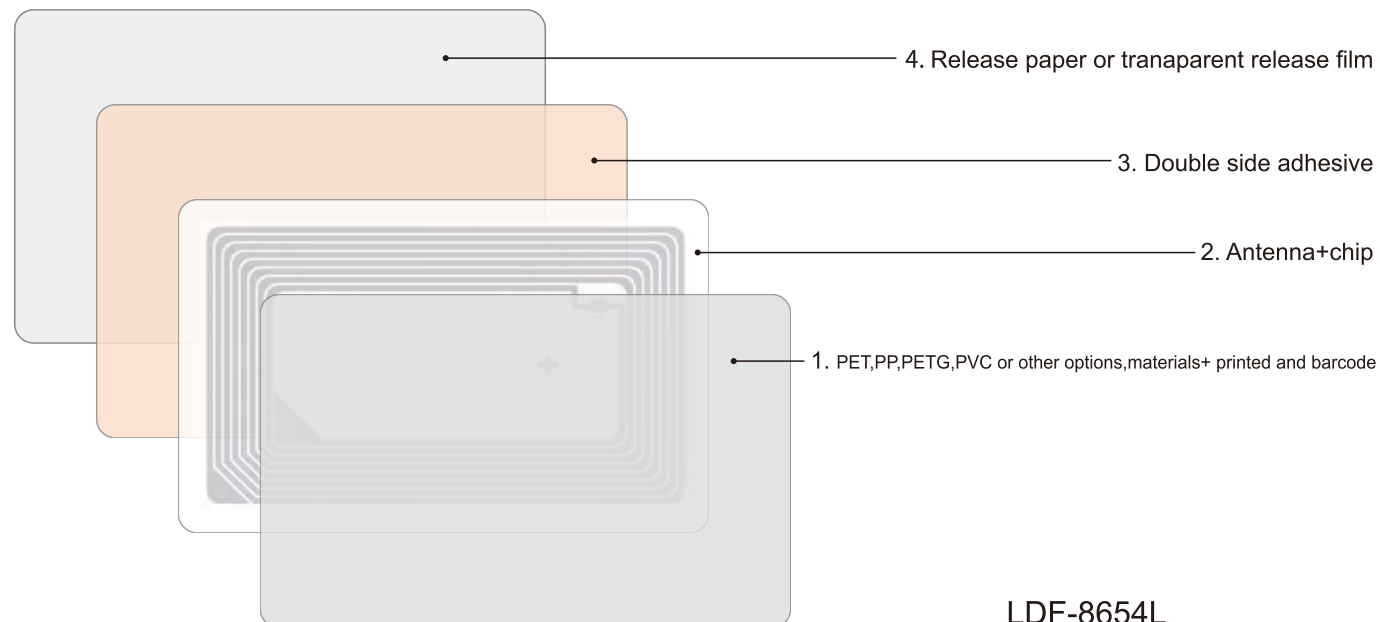

RFID Parameters

Item No.	LDF-8654L	
Protocol	ISO/IEC 15693 & 18000-3	
Frequency	Worldwide HF 13.56Mhz	
Chip	ICODE® SLIX	ICODE SLI(ICODE 2)
Memory	UID8Byte 、User1024Bit	UID 64bit 、User 1024Bit

Read Range	0.1-20cm adjustable (reader and environment dependent)	
Data Retention	10 years	
Write Endurance	100,000 cycles	
Anti-collision	Support multiple tags reading	

Physical Parameters

Size	86×54mm (Can be customized)
Substrate Material	Transparent release film
Antenna Material	Aluminum etching
Surface Material	Coated paper(Thermal printable)
Encode	Supported
Installation	Self adhesive
Operating Temperature	-25°C ~ +65°C
Operating Humidity	20% ~ 90%RH
Package	2000pcs/roll, 4 rolls/carton

RFID Wristband

The RFID wristband is a disposable wristband using RFID technology. It can be made of multiple layers of PVC or paper materials. It has the characteristics of resistance to tension, comfort and durability, comfortable to wear, beautiful in appearance, and decorative; Divided into disposable wristbands and reusable wristbands, the main function is object recognition and tracking. Customers can customize the material and size according to their needs.

Customized Service:

- Customizable size
- Optional chips
- Optional materials
- Optional glue
- Optional printing
- Optional crafts

Application

- School and hospital;
- Sport race timing, amusement park;
- Bathing spot management, moist places;
- Swimming pool, bath center, access control;
- Ticket, Waterproof inspection, campus;

UHF RFID Hard Tag

Hard tags can be directly attached to "harder" products. Hard tags have a higher one-time cost than soft labels and can be reused. Has good waterproof and moisture resistance, wear and tear resistance, ruggedness, shock resistance and other properties. Product chip, frequency, shape, color, etc. can be customized according to demand.

RFID Keyfob

The RFID key fob is composed of ABS shell encapsulating the chip coil and filled with epoxy resin, and combined by ultrasonic welding. The product is small in size, easy to carry, strong and durable, and does not fade. It can be hung on the key chain; the surface can be spray coded, engraved, sprayed and engraved with water, sprayed with letters, etc.

UHF RFID Animal Tag

Animal labels are radio frequency animal labels developed for animal husbandry management. The label uses imported TPU material, which is soft and environmentally friendly. Widely used in animal husbandry tracking and management system, it can track the entire life cycle of animals, effectively reduce the outbreak of diseases and epidemics, and minimize losses. It is widely used in livestock breeding and dairy cattle supervision.

Read&Write	Supported
Read Range	1-10meters adjustable(reader and environment dependent)
Data Retention	10 years
Write Endurance	100,000 cycles
Anti-collision	Support multiple tags reading

Physical Parameters

Size	Tag: 96×27.5×13.5mm Stud: Dia 29×24.8mm (can be customized 可定制尺寸)
Color	Green, yellow, other color customized
Antenna Material	PET+ Aluminum etching
Surface Material	TPU AAA, soft, non-toxic, Anti-microbial, UV-light proof and environmental friendly
Installation	Ear tag plier
Operating Temperature	-10℃ ~ +65℃
Operating Humidity	20% ~ 90%RH
Package	Ear tag&stud/set, 100sets/bag, 10bags/carton
Customized Service	Laser printing, EPC pre-written, color, laser printing, chip&inlay

No chip animal ear tag series

Multi-use Ear tag Applicator

1. Ear marking plier is used to install the ear tag on the pig, sheep, cattle etc.
2. Aluminum alloy material, shell high-grade painting material never rust, durable.
3. Resonable design according to the human plam, automatic lock , easy to operate.

Operating Temperature	-20℃ ~ +80℃
Operating Humidity	20% ~ 90%RH
Package	Ear tag&stud/set, 100sets/bag, 2500pcs/carton
Customized Service	Laser printing, EPC pre-written

RFID Smart Card

"Smart Card" is based on IC card technology and uses computer and communication technology as a means to connect the various facilities inside the intelligent building into an organic whole. Users can complete the usual key and fund settlement through an IC card. , Attendance and certain control operations, such as opening the door with the IC card, shopping, entertainment, meetings, parking, charging services and other activities.

Access Card

Canteen Card

Hospital Card

Traffic card

RFID Reader

The RFID reader automatically recognizes the target object and obtains relevant data through the radio frequency identification signal, without human intervention, it can identify high-speed moving objects and can simultaneously identify multiple RFID tags, and the operation is fast and convenient. There are fixed and handheld RFID readers. Handheld RFID readers include low frequency, high frequency, ultra high frequency, and active.

Item No.	LDR-RI01W
Protocol	ISO/IEC 18000-6C and 6B, EPC Class1 Gen2
Frequency	Worldwide 840-960Mhz, US 902-928mhz, EU 865-868Mhz
Antenna	Built-in 8dbi Circular polarization antenna
Transmit Power	0 ~ 30dBm adjustable
Working Mode	Read&Write supported
Reading Speed	Max. 100tags/s
Read Range	1-6m adjustable, tag and environment dependent
Software Kits	Provide free Demo for testing and SDK for development
Software Compatibility	Win XP, Win7, Win8 or Win10

Physical Parameters

Size	235x235x57mm(US) 260x260x45mm(EU)
Material	ABS Waterproof
Mounting	Bracket
Data Interface	WIFI, RS232/UART
Power Supply	Single +9V~12V DC
Operating Temperature	-10°C ~ +60°C
Operating Humidity	20% ~ 90%RH
Accessories	1×Bracket, 1×Power cable
Package	200pcs/box, 10boxes/carton, G.W 14kg, carton size 32×48×14cm
Customized Service	Ethernet/wifi port; Cable meters; Relay; External antenna; Module; Led indicator; Circular antenna;

Application

- Intelligent traffic management, such as custom clearance, parking lot;
- Logistics such as container management, pallet management;
- Ticketing, school attendance, asset tracking;
- Access control, automatic weighting;
- Animal tracking;

UHF Module

RealChip R-20C series products are a radio frequency module developed by our company based on the most advanced INDY R2000 radio frequency chip in the United States. Therefore, this product inherits the multi-label high-performance identification capability of INDY R2000 chip. It can be equipped with single-channel, four-channel or eight-channel inductive input, which is convenient to deal with a variety of Internet of Things application scenarios.

Power consumption parameters

Item No.	MCR-600	MCR-800	MCR-900
RF Channel	Single channel	Four channel	Eight channel
Connector	MMCX	SMA	SMA
Antenna Connection Mode	Single Antenna	Four Antenna	Eight Antenna
Interface Connector	Molex 53261-1571		
RF Connection Material	Gold-plated brass		
PCB Material	Rogers FR4 gold-plated		
Shield Material	Aluminum		

Physical Parameter

Operating Voltage	3.7V-5V
Standby Mode Current	<50mA (EN high level)
Sleep Mode Current	<100mA (EN low level)
Operating Temperature	-10°C ~ +50°C
Output Power	0 – 33dBm
Receive Sensitivity	< -85 dBm
Peak Inventory Speed	> 700PCS/S
Label Buffer	@ 96 bit EPC
Tag RSSI	Supported
Antenna Detector	Supported
Ambient Temp Monitor	Supported
Working Mode	Single/DRM
Host Communication	TTL Uart port / TTL Uart
GPIO	2 inputs optical coupling, 2outputs optical coupling
Max Baud Rate	115200 bps
Heat Dissipation	External cooling fin
